RESIDENZA COMO'S DYNAMIC ELEGANCE

## In Rome as in New York

An ancient building designed by the futurist architect Angiolo Mazzoni Del Grande, located in a strategic area of Rome, just a few feet away from Villa Torlonia. Following in the footsteps of Amy Tesciuba's studio and its international, young and dynamic team, Purim Holding Spa is a leader in property refurbishment. This professional partnership has recently resulted in Residenza Como ([www.residenza-como.com](http://www.residenza-como.com)), an elegant Italian-style block of flats originally designed by the architect Del Grande, but now offering all

the best American comforts of home. The imposing building located in 1,3,5, via Como, still retains its ancient charm, while combining the most advanced home automation technologies with the latest energy-saving systems. Flats, with or without balconies, are from 50 to 130 m<sup>2</sup> or more in size, with the possibility of linking two or more units to form one or two-level houses. Opportunity is given to purchasers to personalise their new flats to their own tastes and requirements, by choosing from a selection of the latest high-quality materials. The renovation is carried out by Purim Holding Spa, which is planning the construction of a swimming pool and a wellness centre with common areas for residents. A visit with the sales department staff will allow customers to see their style and quality. For further information, visit [www.residenzacom.com](http://www.residenzacom.com)

MATCHLESS DESIGNS

## Designer of thrills

«I like giving people a thrill»: this is how Alessandro Marchelli describes himself and his studio AM+D, that is Alessandro Marchelli + Designers. We are in Nizza Monferrato, in the Asti province. At the Arcano Restaurant, guests arrive along a "multi-sensorial tunnel" and choose the environment most suited to the person, between "Sala Mysterium", "Sala delle Luci" and "Sala Convivium". At Cpn, a multi-specialist medical centre, suffused, coloured, led lights put patients at their ease, amongst reflections and shadows on walls in shaded laminate. Marchelli's most recent creation is Stilnovo "Wellness Mind Design Hair", at Cossano Belbo. A sensorial journey, guided by the light imprisoned by Marchelli according to environments and occasions. In the hall, dawn mirrors itself in the digital mosaic to enjoy the "slowness of the moment". The mauve resin flooring is streaked with glints of gold. White veils and rays of light accompany the work of the hair stylists. You enter the wellness centre through a curtain in alcantara and in the

area for resting on the "Kyrios Nus" chaise longue, upholstered in gold leaf, or else on the large "Magnus A" sofa in shiny white leather; both designed by Alessandro Marchelli.
